- **Updates of IGF** – Okutani, MAG member of global IGF provided an update.
 - In Dec 2015, there will be a UN General Assembly to approve the renewal of UNIGF and its mandate. Therefore the MAG is focusing on demonstrating specific output and especially on inter-sessional work from last year such as the Best Practice Forum. 6 themes of the BPF has been identified. There will be online discussions with working groups and the general directions of the best practices will be agreed at the face-to-face meeting. A document will then be compiled and distributed to different stakeholders including governments, technical community and others.
 - There is a new idea of clear policy messages to be released based on the themes put up in the main session, e.g. WSIS review, IGF Mandate.
 - The MAG called for better collaboration between global and regional & local initiatives and to have common horizontal themes. The theme has not been finalized but one of the strong preferences is “Connecting the Next Billion”. It is encouraged that APrIGF community could incorporate this and feed the output into the global discussion
 - The MAG is trying to strategize the outreach and convince delegates attending the UN General Assembly in Dec on the effectiveness of UNIGF.
